TREASURE HUNTING

GARRETT
PRO-POINT™

MADE IN
THE USA

GARRETT[®]
METAL DETECTORS

ESCAPE FROM ROUTINE

The office. The grind. The daily pressure.
It's healthy to take a break once in a while.
Grab your Garrett and get out there. Unwind and
search for that great find wherever your "there" may be.

ONE MAN'S HOBBY CREATED A LIFETIME OF ADVENTURE FOR MILLIONS

Charles Garrett developed a passion for treasure hunting at a young age. When he began designing metal detectors, his original goal was to simply build a better tool for his own treasure pursuits than what he could purchase.

In the process, Garrett's vision became a 50-year odyssey of exploration and innovation that has revolutionized the sport of metal detecting.

Charles and his wife Eleanor Garrett are proud to have made an outdoor sport available to millions of people worldwide to enjoy. And they are proud their quality products continue to be made in America, deep in the heart of Texas.

GARRETT'S GOALS IN 1964...

BUILD THE BEST DETECTORS POSSIBLE

Charles Garrett started with patented technological advances such as the first independently operated dual searchcoil system and his Zero Drift metal detector circuitry. Today, Garrett's engineers continue to advance the industry with innovative product design.

OFFER THEM AT FAIR PRICES

Garrett's products continue to be made in America with a goal of keeping them affordable to the hobbyist. The *ACE* detector series became a huge success because of the serious features offered at such a valuable price. The same philosophy of offering premium features at pricing below industry standards has helped ensure the success of such popular detectors as the fully waterproof *AT Pro* and *AT Gold*. Garrett's high performance *ATX* pulse induction metal detector provides gold prospecting results for less than half the price of some competitive products.

PROVIDE THE FINEST POSSIBLE CUSTOMER SERVICE

Charles and Eleanor knew the value of treating each customer on a personal, one-on-one level. They met many of their customers while traveling around the United States, and helped found detecting clubs and sponsored treasure hunts. Today, Garrett continues to support local clubs and detecting events, provides free online training videos, and has a skilled Customer Service staff to assist customers with questions or needs.

...REMAIN THE SAME TODAY.

Garrett searching with one of his ADS series detectors near an abandoned silver mine in Canada.

FIELD TESTED... FIELD PROVEN

Since the 1960s, Charles Garrett and his design teams have made sure that each new product performs as designed and advertised.

The Garrett family detecting in 1970. Left-right: Vaughan, Charles, Charles Jr., Deirdre, and Eleanor.

Garrett in the Red Sea near Egypt in 1988 with a prototype *Sea Hunter* detector on a quest to find Biblical chariots.

Charles Garrett field testing his *Grand Master Hunter CX III* metal detector in Utah, 1992.

WHAT'S ON YOUR BUCKET LIST?

A gold coin? A Civil War belt plate? A silver coin cache?
It's out there, whatever it is. Time to get huntin' for it!

Finder: Michal S., Brno, Czech Republic
Using: ACE 250
Find: World War I Austro-Hungarian officer's bayonet

Finder: Luke A., Kinglake, Victoria, Australia
Using: AT Gold
Find: Gold nugget finds; 23 grams total

Finder: Burdy A., Oslon, France
Using: EuroACE
Find: 22 silver French Medieval coins and also two silver rings

Finder: Evan G. of Oklahoma
Using: AT Pro
Find: 1853 Seated Liberty half dime and an 1852 three-cent piece

Finder: Nathan M., Aylmer, Ontario
Using: AT Pro
Find: .53 carat, 14k gold ring found on south-western Ontario beach and appraised for \$3,490.

Finder: Terry B., Atoka, OK
Using: GTI 2500
Find: High school ring

Finder: Paul S., Hesperia, CA
Using: AT Gold
Find: 19 gold nuggets found by Paul and his wife Mary in two days of prospecting using their AT Gold with 4" Super Sniper coil.

Finder: Charlie W. of Idaho
Using: Infinium LS
Find: Silver coin cache

Share Your Treasure Adventures with Garrett

Garrett products awarded monthly in Vaughan Garrett's Favorite Find of the Month contest.

See page 47 for details.

Finder: Mathieu C., Herault, France
Using: *ACE 150*
Find: Chanel watch with 1.6 carats of diamonds found in the sand on a beach in southern France.

Finder: Ovidiu P., Brasov, Romania
Using: *GTI 2500*
Find: 75-coin hoard of silver Roman coins, dating between 350 to 384 AD.

Finder: Daniele S., Rosignano Solvay, Toscana, Italy
Using: *ATX*
Find: World War II battalion relics

Finder: Rob P., Grayson, GA
Using: *AT Pro*
Find: Civil War Confederate buckle

Finder: Michael B., Palmer, TX
Using: *AT Gold*
Find: A 1889-0 Morgan silver dollar and a 1922 Peace Dollar.

Finder: Bill W., Lake City, MI
Using: *ACE 250*
Find: Diamond ring appraised at \$4,665

Finder: Staff Sergeant Chris P., Murrieta, CA
Using: *Infinium LS*
Find: Jewelry found at the beach while Chris was stationed at Okinawa, Japan.

Finder: David K., Victoria, Australia
Using: *ATX*
Find: Four nuggets found in area heavily prospected by other detectors.

Finder: Hapchina I., Bacau Romania
Using: *ACE 250*
Find: Approximately 2000-year-old hoard of Roman silver dinars

What will you find with your Garrett?

TREASURE CAN'T HIDE FOREVER

Especially if you're using a Garrett *Pro-Pointer* to locate your finds. Just ask Ringy and KG, stars of the hit TV series *Diggers*. You won't catch them in the field without their *Pro-Pointers*!

GARRETT PINPOINTERS OVERVIEW, APPLICATIONS

TECHNICAL SPECIFICATIONS: AT PRO-Pointer vs PRO-Pointer

COMPARISON CHART	GARRETT[®] PRO-POINTER AT	GARRETT[®] PRO-POINTER
Proportional audio/vibration pulse for target indication	✓	✓
Fully waterproof?	Yes, to 10 feet (3m)	No. Weatherproof, splashproof. (IP 68)
360° side scan detection plus pinpointing tip	✓	✓
Fast Retune (quick-press to shrink detection field)	✓	No; use Power on/off retune method
Adjustable sensitivity	✓	No
Lost Pro-Pointer alarm	✓	No
Automatic power off	✓	No
Ruler with inch/cm markings	✓	No
Lanyard attachment loop	✓	No
Automatic tuning at turn-on?	✓	✓
Patented scraping blade	✓	✓
LED light	✓	✓
Operating Temperatures	-35°F (-37°C) to 158°F (70°C)	-35°F (-37°C) to 158°F (70°C)
Total weight	6.5 oz. (0.2 kg) w/battery	6.5 oz. (0.2 kg) w/battery
Battery	9V (included)	9V (included)
Warranty	2 Year, Limited Parts/Labor	2 Year, Limited Parts/Labor
Web holster	Included	Included

Advantages of Pinpointers

Garrett's *PRO-Pointers* are miniature metal detectors that enable you to recover detected targets faster.

- Speed your target recovery; more time to detect!
- Accurately find small items and prevent digging large holes.
- Identify multiple targets in close proximity.
- Search in tight areas or use as a utility pinpointer to locate nails and metal wall studs in homes or to locate rebar, conduit, etc.

Retuning for Environment and Targets

Both of Garrett's *PRO-Pointers* are able to quickly tune out mineralized ground or saltwater. This retuning technique can also be used to narrow in on large targets and to help gauge a target's size/depth.

To retune the standard *PRO-Pointer*, use a quick power off and on process to shrink the detection field. To tune out saltwater, wet sand or highly mineralized ground, hold the tip of the pinpointer to the water, sand or soil as you turn on the power—thus instantly adjusting the pinpointer to the environment.

Retuning the *PRO-Pointer AT* is even faster. Simply quick-press the button for an instant retune.

Things to Know About Pinpointers:

- Garrett's *PRO-Pointers* operate in an All-Metal Mode, meaning they will react to both ferrous and non-ferrous targets.
- Turn off your pinpointer after every use. It is designed to tune itself to its environment each time it is turned on.

GARRETT® PRO-POINTER AT

THE NEW PRO OF ALL TERRAIN PINPOINTING

More sensitive than our standard *Pro-Pointer* and it is fully submersible!

One-Touch™
TREASURE HUNTING

Key to Features/Technology: see page 46

- **Fully waterproof to 10 feet** with orange color for added visibility underwater.
- **Maximum Sensitivity** for improved detection of nuggets and other small targets. Choose from three Sensitivity levels.
- **Fast Retune:** Quick button press instantly tunes out environment or narrows detection field for precise pinpointing of larger targets.
- **Lost Pro-Pointer Alarm:** After 5 minutes with no button presses, the pinpointer emits periodic warning chirps.
- **Automatic power off** after 5 minutes of warning chirps; saves batteries.
- **Simple, single-button operation** for Power, Retune, Sensitivity adjustment, and Stealth Mode.
- **Patented Proportional Audio/Vibration**
- **Patented scraping blade for searching soil**

Includes durable woven holster for attaching to belt or to digging pouch.

PN: 1140900
MSRP: \$149.95

Fast retune feature quickly tunes out mineralized ground, salt, and other challenging environments.

Ruler in Inches and Centimeters molded into side of pinpointer to judge target depth

More Info:

- LED for low light uses.
- Includes woven belt holster and 9-volt battery.

The new *Pro-Pointer AT* is more sensitive to fine gold and is ideal for searching river bedrock.

Patent US 7,575,065 and patents pending.

WATERPROOF TO 10 FEET!

GARRETT PRO-POINTER®

ESSENTIAL DETECTING ACCESSORY

Save time and find more targets with the pinpointer that is as valuable to a digger as a shovel!

The *Pro-Pointer's* LED flashlight helps illuminate dark recovery areas.

One-Touch™
TREASURE HUNTING

Key to Features/Technology: see page 46

- **Patented Proportional Audio/Vibration**
Increases as pinpointer approaches target.
- **Pinpoint tip detection**
(360° Side Scan detection)
- **Automatic tuning** at power on.
- **Sensitivity optimized** for widest variety of uses.
- **LED light for low light uses.**
Twice to 6x the battery life of other pinpointers with LED lights.
- **Belt Holster and 9V battery are included**
- **Water resistant**
Meets IEC 60529 IP 66 standards for water and dust protection. Can be operated in the rain, but should not be fully submerged in water (only the tip, as shown below).

PN: 1166000
MSRP: \$129.95

The *Pro-Pointer* features a patented scraping blade for searching sand, soil or gravel.

Tip of the *Pro-Pointer* may be submerged.

Unit can be rinsed under running water but it should not be submerged beyond the power switch.

Pro-Pointer tip:

Because the *Pro-Pointer* is a static, non-motion detector it should be switched off after each use to maintain optimal operation.

Ina F. and Kelley R. from Virginia found these 3 gold coins while hunting with their well-used Garrett *PRO-Pointers*.

VLF DETECTORS

Recommended for most hunting environments

What's a VLF metal detector?

The most commonly-used metal detectors are Very Low Frequency (VLF) models, which continually transmit energy at a single powerful frequency, generally ranging between 3 kHz and 30 kHz.

Advantages of VLF Detectors

Most soils you will search contain only light mineralization. In these environments, the single frequency of a VLF offers greater depth capabilities, enhanced Target ID, and better discrimination. VLF detectors are also very energy efficient and are less susceptible to external noise and interference.

In short, it is the most appropriate technology for detecting the broadest range of targets over the most common ground conditions.

Things to Know About VLF Detectors:

- VLF metal detectors are also commonly referred to as Single-Frequency or Continuous Wave detectors.
- Saltwater environments and heavily mineralized soils can cause a loss of detection depth and Target ID accuracy. Pulse induction detectors are often favored here.
- Lower frequency detectors tend to be more sensitive to more highly conductive metals such as silver or

brass. Higher frequencies are generally more sensitive to mid conductivity metals such as gold, platinum, and lead.

VLF Tip: Ground Balance Feature

Soil mineralization levels often change in the field, and this can create unstable detector performance. Higher-end detector models with Ground Balance features allow the user to adjust the detector's ground balance as these conditions change. Ground balancing a detector calibrates it to the changing soil conditions, resulting in deeper target detection, more accurate target information, and quieter detector operation.

MY TIME. MY TREASURE.

Treasure hunting can happen anytime, anywhere.

It's all about making time to enjoy a little time in nature...

ACE OVERVIEW AND APPLICATIONS

ACE 150:

Light weight, powerful, entry-level detector that's easy to learn. Simple One-Touch operation; turn on and begin hunting!

Ideal for: Coins, jewelry, dry beach and fresh water wading. Can also be used for entry-level prospecting and relic hunting.

ACE 250:

A powerful performer at a bargain price. The ACE 250, a worldwide best seller, has more modes and enhanced features to help find more treasure.

Ideal for: Coins, jewelry, relics, dry beach, fresh water wading and competition events. Can be used for entry-level prospecting or cache hunting.

ACE 350:

The top of the ACE family, the 350 has advanced iron discrimination, a powerful DD coil, a higher frequency, and volume control headphones.

Ideal for: Coins, jewelry, relics, dry beach, fresh water wading, competition events, cache hunting, and it has improved features for prospecting.

DUFFLE/TOTE BAG

Store your ACE detector and its accessories in this handy duffel bag. Approximately 23" length with shoulder strap and carrying handles.

ACE Sport Tote Bag
PN: 1651500 \$14.95

Searchcoil Tip: The Super Sniper searchcoil is an ideal optional accessory for any detector if you plan to search for targets in tight areas—such as among roots, rocks or even under playground equipment.

NO BOUNDARIES

Weatherproof. Rainproof.

Waterproof to 10 feet.

What did you expect with "All-Terrain" in the name?

Chris W. of Winchester, VA found this coin cache with his AT Pro.

AT GOLD - AT PRO COMPARISON

AT GOLD

» Dave M. of California with an 11 pennyweight (17.1 g) gold nugget he recovered using his AT Gold.

AT Gold Tip: Try an optional larger coil on the AT Gold using the All Metal Mode to search for deeply buried coins and relics.

AT PRO

» Beau O. of Maryland with 6 pounds of silver coins—from the 1780s to 1830s—he recovered in a river using an AT Pro.

AT Pro Tip: The optional 5x8" DD searchcoil is designed for picking good targets out of trashy, iron-infested hunt sites.

AT Gold:

Offers deeper detection on tiny gold nuggets, relics and small jewelry. Includes advanced ground balance and iron identification features.

Ideal for: Highly mineralized ground and challenging prospecting terrains. Recommended for freshwater hunting.

AT Pro:

Choose from easy-to-learn Standard Modes or advanced Pro Modes for more target information and depth.

Ideal for: Coins, jewelry, relics, and gold. This all-terrain detector can be submerged in either saltwater or fresh water.

» Fanel S. of Romania found these 3,000-year-old golden rings—deemed “exceptional” by his country’s national museum—using his AT Pro.

» Dan F. of Virginia with a Civil War-era artillery shell find.

» Steve S. of California found these gold nuggets searching near the El Paso mountain range. He was using his AT Gold with the Super Sniper coil.

ALL TERRAIN, ALL TREASURE

Ideal for gold nuggets, coins, relics, caches and jewelry in every terrain, even in fresh water to ten feet.

Key to Features/Technology: see page 46

• True All-Metal, Motion Deepseeking Mode

Provides deepest detection and sensitivity in mineralized soils.

• All-Metal Iron Audio™

Garrett Exclusive feature that audibly identifies iron while operating in a True All-Metal Mode (also available in the two Discrim Modes).

• Ground Balance Window

Garrett Exclusive feature that allows user to “spread” the ground balance setting to reduce the response to subtle ground variations.

Pro Mode Audio

Proportional Audio and Tone Roll feature allows user to hear subtle changes in target’s response to better judge its conductivity, size, shape and depth.

Ground Balance

Automatic and manually adjustable for improved performance.

Adjustable Threshold

User can manually adjust the audio threshold (the constant background sound) to better hear targets.

Fast Recovery Speed

Allows greater ability to pick out good targets amongst trash.

• Search Modes

All-Metal, Discrim 1, Discrim 2, plus electronic Pinpointing

More Info: Continuous Coin Depth Indicator to determine target depth. Battery Condition Indicator shows battery life. Graphic Target Analyzer identifies target’s conductivity.

See pg. 24 for interchangeable AT Gold searchcoils.

PN: 1140680
MSRP: \$799.95

Instructional DVD Included
PN: 1679600

Land Headphones Included
PN: 2202400

Standard Searchcoil
5" x 8" PROformance™ DD coil

All-Terrain Versatility

Weatherproof housing designed for dusty, humid, or wet environments; unit can be submerged to a maximum 10-foot depth.

High-Res Iron Discrimination

Includes 44 levels and exclusive All-Metal Iron Audio feature.

True All-Metal Mode

For deepest detection; plus two pre-set Discrim patterns (modes).

Digital Target ID

0 to 99 Target ID offers increased ability to distinguish one target’s conductivity from another.

Confederate Civil War plate found by Tim S. with AT Gold

18 kHz Frequency

Improved detection of small targets, gold nuggets, jewelry, etc.

» The preferred detector used on the TV series Diggers!

AT^{PRO}

BRING HUNTED-OUT SITES BACK TO LIFE

Impressive recovery speed, target separation and detection depth!

Key to Features/Technology: see page 46

Pro Mode Audio

Proportional Audio and Tone Roll feature allows user to hear subtle changes in target's response to better judge its conductivity, size, shape and depth.

High Res Iron Discrimination™

Allows user to set iron discrim to one of 40 levels for precise ability to separate good targets from trash.

Iron Audio™

Allows the user to hear discriminated iron and to alter the detector's mid-tone signal's range.

All Terrain Versatility

Weatherproof housing designed for dusty, humid, or wet environments; unit can be submerged to a maximum 10-foot depth.

Fast Recovery Speed

Allows greater ability to pick out good targets amongst trash.

More Info: Continuous Coin Depth Indicator to determine target depth. Battery Condition Indicator shows battery life. Graphic Target Analyzer identifies target's conductivity.

See pg. 24 for interchangeable AT Pro searchcoils.

Beautiful diamond ring was found by Dan P. of Oahu, Hawaii with his AT Pro.

PN: 1140460
MSRP: \$699.95

Instructional DVD Included
PN: 1679500

Land headphones included
PN: 2202400

Standard Searchcoil

8.5" x 11" *PROformance™* DD coil

Mike L. of Salem, VA found these 14 silver coins in one day on an old baseball field using his AT Pro.

Entire detector is fully waterproof to 10 Feet

Ground Balance

Automatic and manually adjustable for improved performance; includes saltwater.

Digital Target ID

0 to 99 Target ID scale offers increased ability to distinguish one target's conductivity from another.

Six Search Modes

Choose from Custom, Coins or Zero discrimination patterns in either the easy-to-learn Standard Mode or in the more advanced Pro Mode. Also includes electronic Pinpointing.

AT GOLD & AT PRO TECHNOLOGY, FEATURES

PROPORTIONAL AUDIO FEATURE

The *AT Gold* and *AT Pro* feature advanced, proportional (Pro) audio modes. This allows the user to hear subtle changes in a target's response. Proportional audio also helps the user to better judge a target's size, shape and depth and has the additional benefit of a much faster recovery time when detecting adjacent targets.

The *AT Pro* also includes three Standard audio modes, which provide a full-strength beep regardless of a target's amplitude. Many detectorists prefer this simpler, binary (either on or off) target response.

These two adjacent targets would produce one strong signal from a binary audio detector. With proportional audio, a rise and fall of audio response allows the user to hear both targets.

IRON AUDIO™ AND ALL-METAL IRON AUDIO

Iron objects can mask good targets or create "ghost signals" that appear to be good. Garrett's selectable Iron Audio feature allows the user to hear discriminated iron (normally silenced) to help avoid being tricked into digging an undesired target.

For many detectors, bottle caps, steel washers, etc. sound like good targets, producing a high tone response. The bottle cap's shape and flat surface resembles a coin, which tricks the detector. With Iron Audio however, the bottle cap will produce a very distinctive response with multiple tones, compared with a coin's high-tone response.

The *AT Gold* also features All-Metal Iron Audio to identify problematic iron targets while in a True All-Metal Mode, a Garrett exclusive!

tone Roll Audio™

This feature provides the user with more audible target information to help identify targets, particularly iron objects. Metal detectors with binary audio produce a single target tone based on the target's strongest signal. Tone Roll audio provides a variance of target tones as the searchcoil approaches, passes above and departs from a target. These varying phases provide better overall target information.

ADJUSTABLE THRESHOLD

This *AT Gold* feature allows the user to select 33 levels of constant background audio ("hum"). By operating with a barely audible threshold level, this feature helps to maximize the user's ability to hear faint signals thereby maximizing detection depth.

GROUND BALANCE OPTIONS

The *AT Gold* and *AT Pro* both offer manual and automatic ground balance features to allow the user to reduce the detrimental effects of ground mineralization. The *AT Gold* additionally offers Ground Balance Window, a Garrett exclusive feature. This setting allows the user to simultaneously ground balance to a range of values. This smooths out the All Metal Audio by reducing the subtle ground responses and allows the user to better hear faint target signals.

ALL-TERRAIN VERSATILITY

Garrett *AT* detectors are engineered with waterproof housings and connectors to protect in dusty, muddy, wet and humid environments. They can be submerged to a 10-foot depth (maximum).

Note: Waterproof headphones must be used if the headphones are submerged in water. The standard headphones provided with the *AT Pro* and the *AT Gold* cannot be submerged, however the cord leading to the headset is submersible.

AT Gold Tip: Try Disc 2 to improve detector's performance if using the *AT Gold* for saltwater hunting.

The *AT Gold* is designed for freshwater use only.

HIGH-RES IRON DISCRIMINATION™

With adjustable levels of iron discrimination (40 points on the *AT Pro* and 44 points on the *AT Gold*), the user can apply only the minimal amount of discrim needed to reject iron trash targets. The detector will continue to find desirable targets that might otherwise have been "masked" by iron.

High-Res Iron Discrim setting

Digital Target ID number corresponds with Upper Scale conductivity pixel.

DIGITAL TARGET ID (0 TO 99 SCALE)

This scale on the LCD screen helps to more precisely identify buried targets. Items with a value near 1 are the most ferrous, while the most conductive targets (such as thick silver) register closer to 99 on the Digital Target ID.

The *AT Pro* will also ground balance to saltwater.

AT ACCESSORIES

PULSE INDUCTION (PI) DETECTORS

Recommended for heavily mineralized ground and saltwater environments

Advantages of PI Detectors

Pulse detectors provide the best performance over mineralized ground and in saltwater environments due to their ability to ignore minerals by virtue of their pulse characteristics.

Iron Check Techniques

To help determine if a target is ferrous (iron), some users employ a reverse discrimination technique to check the item. With any of the three Garrett pulse detectors, simply increase Discrimination to maximum. If the target still produces a substantial signal, there is a good chance it is iron.

The Garrett ATX additionally offers a true Iron Check feature that produce a low-tone growl sound (Iron Audio) for many iron items.

Things to Know About Pulse Induction Detectors:

- Pulse induction metal detectors are also commonly referred to as multiple frequency detectors.
- Target ID accuracy is reduced or nonexistent as compared to a VLF detector.
- Less energy efficient than VLF detectors, requiring more batteries and/or more frequent battery changes.

- More susceptible to external noise (EMI) and interference.

Saltwater Tips

All PI detectors cancel most of the saltwater response by nature of their operation. In some of the more challenging saltwater environments when operating a Garrett *Infinium* or *Sea Hunter*, you can add a small amount of Discrimination (or Delay) to cancel out the remaining saltwater response. With a Garrett ATX, however, it can be quickly ground balanced to the saltwater to provide the smoothest audio threshold and performance.

LEAVE YOUR LIMITS IN THE DUST

Garrett's pulse induction detectors are built tough, ready to take on whatever environmental challenges you encounter.

TECHNICAL SPECIFICATIONS: Garrett PI Detectors			
COMPARISON CHART	Sea Hunter™ <small>Mark II</small>	INFINIUM™ <small>Land & Sea</small>	ATX™ <small>EXTREME PULSE INDUCTION</small>
Overview	Proven PI technology with 22 Frequencies. Ideal for saltwater hunting and wreck diving use.	Quality PI technology with 96 Frequencies. Great for prospecting, relic hunting, and deep submergence.	Garrett's highest performance PI technology. Provides maximum sensitivity on all targets all the time. Easy access to all controls with one hand. Includes advanced features to overcome the most extreme environmental conditions.
Detection Performance	Good detection on all targets from jewelry to coins to nuggets.	Improved detection on all targets from jewelry to coins to nuggets.	Superior sensitivity on all targets, especially on small, low conductivity items (sub-gram nuggets, fine jewelry, etc.).
Ground Balance Capabilities			
Balances to Saltwater	NO; use Discrim if necessary.	NO; use Discrim if necessary.	YES. Includes salt balance range
FastTrack Ground Balance	NO	NO	YES
Continuous GroundTrack	NO	3 settings: Lock, Slow, Fast	4 settings: Off, Slow, Med, Fast
User Controls/Functions	Control knobs to alter Audio Threshold, Discrimination. Sensitivity/Depth adjustment is fixed.	Control knobs to alter Audio Threshold, Discrimination. Sensitivity/Depth adjustment is fixed.	LED indicators show signal strength, current settings. Easy push-button control to alter Audio Threshold (25 settings), Volume, Sensitivity (13 settings), Retune
EMI Control	Good immunity in moderate EMI environments. No frequency adjustment available.	Good immunity in moderate EMI environments. Requires manual frequency scan and selection.	Excellent immunity in more severe EMI environments. Has push-button automatic frequency scan and selection to provide the smoothest threshold.
Discrimination/Delay	Adjustable via control knob	Adjustable via control knob	25 settings, via push-button control
Iron Audio	NO	NO	YES. Exclusive quick iron ID
Search Modes	Two Trash Elim Patterns (both Motion Modes)	Motion Mode only	Choose from Motion or Non-Motion Modes
Submersion Depth	200 feet (65m)	200 feet (65m)	10 feet (3m)
Headphones (Included)	Submersible	Standard land-use	Standard land-use
Standard Searchcoil	8" Mono PROformance™	10" x 14" DD PROformance™	10" x 12" DD PROformance™
Length (Adjustable)	28" to 52" (.71m - 1.32m)	28" to 52" (.71m - 1.32m)	20" to 68" (.51m - 1.72m)
Total Weight	5.1 lbs (2.3 kgs) stem-mounted	5.5 lbs (2.5 kgs) stem-mounted, 3.8 lbs. (1.72 kgs) hip-mounted	6.9 lbs (3.13 kgs)

Sea Hunter[™] Mark II

WRECK DIVING'S TRUSTED VETERAN

Recommended for heavily mineralized ground and saltwater environments

Spanish reale found by divers working a shipwreck in the Dominican Republic.

Key to Features/Technology: see page 46

PN: 1151970
MSRP: \$749.95

★ **Superior Automatic Salt Elimination Ability**
using advanced Pulse Induction technology.

PN: 1679000 PN: 2202100

Free DVD & Submersible Headphones

included with purchase.

Search Mode

Non-Motion, All-Metal Deepseeking mode with Full Range PI Discrimination

★ **Two Discrimination Modes**

Two discrim modes offer varying levels of non-ferrous target discrimination.

• **Discrete Trash Elimination:**

Use to eliminate most pull tabs and foil without significantly degrading sensitivity for rings, coins.

• **Standard Trash Elimination:**

Provides the deepest possible detection; allows a very slow searchcoil sweep in areas with little trash.

Independently Sealed Battery Compartment

Full length configuration with undercuff mount for balance and maneuverability.

OPERATING DEPTH TO 200 FEET

The Sea Hunter can also be used in the hip mount configuration for surf and beach hunting.

Elimination Control

User adjustable

Audio Threshold

User adjustable

Nicole Slater — spokesperson for "Deep Blue Passion" Modern Day Treasure Hunters — holds a cannonball and Spanish reales just recovered from a shipwreck off the Dominican Republic.

INFINIUM™
Land & Sea

OVERCOMES EXTREME CONDITIONS

Recommended for heavily mineralized ground and saltwater environments.

Key to Features/Technology: see page 46

- ★ **Advanced Pulse Induction technology** for automatic cancellation of salt/ground mineralization. Motion All-Metal search mode.
- ★ **Adjustable Audio Threshold:** set background audio hum to user's preference to better distinguish target sounds.
- ★ **User Adjustable Discrimination** with reverse Iron Check.

User Adjustable Frequency to reduce interference.

Includes instructional DVD, land-use headphones with volume control, hip-mount and belt, battery charger, AA and rechargeable batteries.

PN: 1679000

PN: 2202400

200-Foot Operating Depth
for wreck diving

Hip mount control housing battery pack reduces detector weight for long searches and keeps controls at your fingertips.

HIGH-END, ALL-TERRAIN PULSE PERFORMANCE

Highly sensitive on tiny gold and extends depth in the most extreme mineralized soils.

Five rings found in one water hunt by Rick B. of South Yarmouth, MA.

Key to Features/Technology: see page 46

- ★ **Maximum Detection on all targets** at the same time. No need to switch modes to enhance detection of one target while degrading another.
 - ★ **Advanced Ground Balance:** has wide range to ground balance from heavily mineralized ground (ironstone) to saltwater without switching to special modes.
 - ★ **Quick Iron Check feature** and adjustable Discrimination.
- Motion and Non-Motion Modes:** provides optimum performance based on your hunting preference and conditions.
- ★ **All Terrain use:** fully waterproof to 10 feet (3 meters).

Includes instructional DVD, land-use headphones, soft carry case, detector sling, battery charger, AA and rechargeable batteries, and coil cover.

PN: 1680000

PN: 2202400

PN: 1140860
MSRP: \$ 2,495

Advanced Design DD Searchcoil

10" x 12" *PROformance™*. Provides easy pinpointing and enhanced detection of small items without having to slow the scanning speed of the coil.

Fully Collapsible

Can be operated with its stem fully extended, fully collapsed, or anywhere in between. Collapses down to 20".

Waterproof Speaker and control housing

LED Indicators

Show signal strength and current settings.

Frequency Scan

Auto function for minimizing RFI interference.

Ground Track with 4 settings

Choose setting that best handles rapidly changing ground mineralization.

16 gold nuggets of different sizes found in Alaska by David F. of Kirkland, WA.

» **Extreme Sensitivity**—Locates tiny gold nuggets that other PI detectors miss.

Find fine gold other pulse detectors miss!

EXTREME DETECTION

The ATX is ultra-sensitive to very small targets, such as sub-gram-size gold nuggets, that other pulse machines will not find. Larger size gold, jewelry, and even relic targets can be detected at greater depths

No confusing programs to learn

OPTIMIZED PERFORMANCE ON ALL TARGETS

The ATX is designed to optimize your effectiveness to all targets, including tiny gold. There is no need to switch modes to enhance detection of one target while degrading another. The ATX provides maximum detection on all targets all the time.

Fully Waterproof

ALL TERRAIN HUNTING

The ATX can be fully submerged to 10 feet (3 meters) for shallow water searches. Advanced Ground Balance technology allows the ATX to balance to saltwater without having to switch to a special mode.

ATX Includes:

- Land Headphones
- Soft Carry Case
- AA Alkaline and Rechargeable batteries
- Battery charger
- Coil cover (not shown)
- Detector sling
- Instructional DVD
- Owner's manual

* Accessory items subject to change

Advanced Ground Control

GROUND BALANCE/GROUND TRACK

The ATX has a wide range of ground balance, allowing the detector to ground balance from heavily mineralized ground (ironstone) to salt-water without switching to special modes. In areas of variable ground conditions, choose from four GroundTrack settings (Off, Slow, Medium, Fast) to maintain maximum detection depth.

Superior Flexibility

MOTION AND NON-MOTION MODES

Achieve optimum performance based on your hunting preferences and existing conditions. Motion Mode (which requires the coil or target to be in motion) is generally preferred, as it is more stable and quiet. The advanced Non-Motion Mode allows the greatest detection depth and very slow, or even stationary, scanning over targets.

Adjustable Operating Lengths

EXTREME VERSATILITY

The ATX can be operated with its stems fully extended, fully collapsed, or anywhere in between. The searchcoil can be quickly rotated into other orientations to scan embankments or walls.

No assembly necessary

EXTREME DURABILITY

Simply remove the ATX from its soft case and it is ready for operation. This rugged detector, designed to military specifications, protects all coil cables and electronics within its sturdy housing.

The ATX soft case is designed to hold the assembled detector and optional searchcoils. Includes internal pockets and fasteners to secure items.

2-level target signals

TONE AND VISUAL TARGET INFORMATION

The ATX responds to all metal targets encountered with a high or low proportional tone signal (except for an item that has been discriminated). An LED bar graph display indicates signal strength and also indicates detector setting levels. The ATX also includes Volume Control, allowing the user to limit the response of large targets in order to better hear deep/faint signals

Unique discrimination ability

QUICK IRON CHECK

The ATX has twenty-five levels of discrimination and a Quick Iron Check function to audibly identify iron targets. Iron targets will produce a very low-tone growl/grunt sound that may or may not be flanked by normal tones.

Easy-access adjustments

FULL USER CONTROL

Single push-button controls at your fingertips allow one-hand operation. There's no need for a second hand to make adjustments to sensitivity, discrimination, or other controls.

30 Plus years of Pulse Experience

DESIGNED TO OVERCOME EXTREMES

Gold prospectors and relic hunters can choose this detector with confidence. The ATX and its technology have been tested in challenging ground conditions around the world, including the most extreme areas of Australia.

Easy and accurate pinpointing

ULTRA-SENSITIVE GARRETT DD SEARCHCOIL STYLE

- Exclusive Garrett DD Technology: innovative new design improves pulse detector performance.
- Superior ground cancellation and coverage, impressive depth, and iron identification.
- Enhances detection of small items without having to slow down the scanning speed of the coil.
- Easier pinpointing than traditional DD Coils.

Most impressive is the coil's extreme sensitivity to sub-gram-size gold nuggets. The unique "sweet spot" in this ATX coil's center also makes pinpointing a tiny target very easy.

Steve H. of Reno, NV found these four gold nuggets with his ATX. The smallest pieces are 0.12 grams and 0.16 grams.

ATX SEARCHCOILS & ACCESSORIES

ATX SEARCHCOILS

DeepSeeker 15" x 20" (38cm x 50cm) Mono Searchcoil

Use for locating larger and more deeply buried objects. Includes surface debris elimination.

PN: 2234100 \$599.95

10" x 12" (25cm x 31cm) DD Searchcoil

Standard with ATX

PN: 2234600 \$529.95

8" (20cm) Mono Searchcoil

Excellent depth on small targets. Enhanced maneuverability in heavy scrub and tight areas.

PN: 2234000 \$529.95

15" x 20" Mono Closed Coil Cover

Provides solid protection for searching rocky soil areas. Bottom side of solid coil cover base can be used with your fingers to help locate tiny gold pieces.

PN: 1608300 \$29.95

15" x 20" Mono Open Coil Cover

Lighter weight. More maneuverable when searching below water; collects less sand and sediment than a closed cover.

PN: 1608200 \$29.95

10" x 12" DD Open Coil Cover

Lighter weight. More maneuverable when searching below water; collects less sand and sediment than a closed cover.

PN: 1607500 \$19.95

10" x 12" DD Closed Coil Cover

Provides solid protection for searching rocky soil areas. Bottom side of solid coil cover base can be used to help locate tiny gold pieces.

PN: 1607600 \$24.95

8" Mono Closed Coil Cover

Provides solid protection for searching rocky soil areas. Bottom side of solid coil cover base can be used to help locate tiny gold pieces.

PN: 1607700 \$19.95

ATX ACCESSORIES

Garrett ATX Hard Case

Military-grade plastic. Designed to hold ATX soft case inside.

PN: 1626500 \$199.95

ATX Shaft Nut Spanner Wrench

Use for removing camlocks on the ATX for thorough interior cleaning of assembly.

PN: 1625200 \$35.95

ATX Camo Cap

PN: 1664200 \$9.95

Other suggested ATX accessories:

- Waterproof headphones
- Retriever II pick
- Garrett Day Pack with D-ring harness/bungee for attaching an ATX.

See pgs. 42–44 for these and other accessories.

ATX™ DEEPSEEKER PACKAGE

Find deeply buried objects, large gold, caches, relics and more with the oversized ATX DeepSeeker searchcoil. Buy the package and save money—plus get a free hard case!

Savings of \$298⁹⁵ *

PN: 1140820
MSRP: \$2,995.95

Includes:

- ATX with 10" x 12" DD coil
- Soft storage/travel case
- Battery charger
- Land headphones
- AA alkaline and rechargeable batteries
- Searchcoil cover¹ (not shown)

PLUS:

- 20" Deepseeker mono searchcoil
- Military-grade Garrett hard case
- Garrett Detector Sling

* Savings based on actual cost of items if purchased separately.

Accessory items subject to change

IT'S OKAY TO BRAG SOMETIMES.

Enjoy your time with friends.

See who can make the day's best find.

See who makes the oldest find.

There's nothing wrong with a friendly wager between friends...

GOLD PANS

Garrett's *Gravity Trap*® gold pan series has led the prospecting industry for years. These durable pans have been tested and proven worldwide by Charles Garrett, Roy Lagal, and tens of thousands of individual prospectors.

Garrett's *Gravity Trap* gold pans are the perfect tool for gold-seekers of any age. They feature a 90° riffled design that ensures safe, rapid gold recovery in wet or dry conditions. All Garrett pans are lightweight, green for enhanced gold nugget visibility, and are virtually indestructible.

Perfect for Dry Panning

Charles Garrett dry panning for gold in Utah.

Garrett's 90° riffled design prevents gold from sloshing out of the pan.

GOLD PANS

15" SuperSluice

PN 1650400 \$9.95

- Traps fine gold to nuggets over 1 oz.
- Twin 1/2" riffles
- Deep throat funnel

"The Super Sluice pan is the best pan for bulk testing! You can rip through more material faster than any other test pan." Todd Hoffman

14" Sifter/Classifier

PN: 1650200 \$7.95

- Great for wet or dry conditions
- Sifts gold, jewelry, relics and debris
- Fits 5 gallon bucket
- 7/16" (diagonally measured) exit holes

14" Prospector

PN: 1650000 \$8.95

- Great for wet/dry conditions
- Three 1/4" riffles
- General purpose

10" Backpacker

PN: 1650100 \$7.95

- Great for wet /dry panning or finishing
- Four 1/4" riffles
- Lightweight
- Portable

GOLD PAN KITS

Deluxe Gold Pan Kit

PN: 1651400 \$49.95

- 15" SuperSluice Pan
- 14" Prospector Pan
- 10" Backpacker Pan
- 14" Sifter/Classifier
- Gold Guzzler bottle
- 2 Gold vials
- Tweezers
- *How to Find Gold* field guide by Charles Garrett / Roy Lagal
- *Gold Panning is Easy* book
- *Gold Panning Like a Pro* DVD

Gold Pan Kit

PN: 1651300 \$29.95

- *How to Find Gold* field guide by Charles Garrett and Roy Lagal

Start Your Gold Rush Today!

Watch "Gold Panning Like a Pro" video with Freddy Dodge on garrett.com.

The quest to find gold has been around for many generations. Making memories and enjoying the great outdoors with your family is priceless!

(Above) Layne Kochan of Edmonton, Alberta, Canada pans for gold with his sons Joshua and Bryer on their gold claim in British Columbia.

TRUSTED BY 316 MINING

Garrett's Gravity Trap® gold pans are used by Todd Hoffman's mining team to continually test the gold content of the areas they mine with their heavy equipment. "If we're mining dirt without gold in it, we're just burning fuel," says Todd.

"We really rely on our Garrett gold pans," says Todd. "I like that Garrett is family-owned and made in America, a couple of things me and my dad Jack believe in."
—Todd Hoffman, 316 Mining

"We exclusively use the Garrett gold pan. We trust it. For the amount of gold we go through, we want to make sure we get it all."
—Jack Hoffman, 316 Mining

UNDERSTANDING SEARCHCOILS

HOW SEARCHCOILS WORK

Understanding the basics of searchcoils will empower you with the ability to choose the best searchcoil for each application. Searchcoils generally consist of two internal sets of coiled wires, a Transmit coil (TX) and a Receive coil (RX). Mono coils can be different in that one coil acts as both the TX and the RX. When the detector is turned on, the TX coil generates a magnetic field in the surrounding space.

When a metallic object is within this generated magnetic field, it will create a distortion in the magnetic field. The RX coil will sense this distortion and send a signal to the control housing.

The transmit coil (TX) creates a magnetic field while the Receive coil (RX) senses distortion in this field and signals the control housing.

SEARCHCOIL DEPTH

As a rule of thumb, the detection depth of a searchcoil will be approximately equal to its diameter, for a coin-sized object.

As a searchcoil's size increases, its field pattern becomes larger, less concentrated and it begins to miss small objects. For a coin-sized object, this effect becomes noticeable when using searchcoils larger than about 15" in diameter.

Generally speaking, the larger the searchcoil, the larger the magnetic field.

SEARCHCOIL SHAPES AND SIZES

To help determine the best searchcoil size and shape for your needs, consider the hunting environment in which it will be used and the targets being sought.

Circular

Elliptical

The two most common searchcoil shapes (not to be confused with configurations) are circular and elliptical.

- **Elliptical Searchcoils**—more maneuverable than a circular searchcoil. Provides greater coverage than a circular coil due to its elongated length.
- **Circular searchcoils**—most commonly used shape. Provides slightly more detection depth and sensitivity in non-mineralized soil. Searchcoils also come in a 2-box configuration, which are used for detecting deeply buried targets.

Small Searchcoils (Less than 6" diameter)

- Concentrated magnetic field; the best choice for hunting in areas with a lot of metal debris.
- Ideal for detecting very small objects.
- Less coverage per sweep; more scans required.

SUPER SNIPER

Available for GTI, ACEs, AT Pro and AT Gold

Garrett's smaller *Super Sniper* specialty searchcoils are designed to search in very tight areas or over ground that is littered with metal objects. These popular 4.5" coils offer improved target identification and are also ideal for finding tiny gold nuggets.

Medium Searchcoils (8"-9" diameter)

- Best choice for general-purpose hunting (including coins and coin-sized targets).
- Provides the best combination of magnetic field concentration, detection depth and capability to detect the greatest range of target sizes within the detection area.
- Lightweight and easy to maneuver.

There is a direct relationship between the size of a searchcoil and the size of its magnetic field.

The magnetic field of a small searchcoil is not as deep as that of a large searchcoil, but is more concentrated.

Large Searchcoils (More than 9" diameter)

- Provides greater depth and coverage due to wider and deeper magnetic fields.
- Best choice for hunting targets that are large and deeply buried, such as caches and large relics.
- Larger scan area can be a problem in trashy areas where the searchcoil is detecting several targets at once.

CONFIGURATIONS

There are five basic searchcoil configurations: Concentric, Mono, Imaging, DD and 2-box. Hunting applications and ground conditions help determine which is the best choice for you.

Concentric Searchcoils

- TX and RX are usually arranged as shown.
- This configuration **provides the largest possible detection field and greatest detection depth**, making the concentric coil potentially the most sensitive configuration available.
- Provides the most symmetrical detection field, allowing ease in pinpointing and consistency in target identification.
- Unfortunately, this configuration is the most susceptible to interference from ground minerals, resulting in substantial performance loss over heavily mineralized ground.

Mono Searchcoils

- Available only on Pulse Induction Detectors.
- Variation of the concentric configuration. Can be made with the TX and the RX coils located together or as a single coil acting as both the TX and RX.
- Detection and performance characteristics of mono coils are essentially the same as concentric coils.

DD Searchcoils

- Both TX and RX are in the shape of a "D".
- Provides greater detection depth and performance in heavily mineralized ground and saltwater.
- A long, narrow detection field runs beneath the DD's overlapping center section from front to back.
- The DD configuration is less sensitive than a concentric searchcoil of the same size, over non-mineralized ground or in air testing.

- DD coils are highly recommended when hunting over mineralized ground commonly found when prospecting and relic hunting. **The DD searchcoil outperforms the concentric searchcoil in highly mineralized soil.**

The DD coil's narrow detection field offers better target separation than a conventional coil.

MULTIPLY YOUR FINDS WITH THE RIGHT SEARCHCOIL

Imaging Searchcoils (Garrett Exclusive)

- An enhanced version of the concentric configuration that features an additional RX coil.
- Extra coil provides additional target information for true target depth perception and true target-sizing capabilities.
- Sizing information helps distinguish between trash and good targets of the same conductivity (e.g. a clad coin vs a soda can).

2-box Configuration (Depth Multiplier)

In this configuration, the TX and the RX coils are physically several feet apart. This provides a lightweight, manageable means of achieving the performance of a 3' to 4' diameter searchcoil. Because of its large detection field, the 2-box is the best choice for detecting large, deeply buried objects such as relics and caches. Also, its large detection field ignores objects smaller than 3" in diameter—advantageous when hunting in areas heavily littered with small trash objects.

Garrett TreasureHound™ EagleEye™ Depth Multiplier

PN: 1611800 \$299.95
(Available on GTI 2500 only)

Benefits:

- Find larger targets at twice the depth of conventional coils.
- Use the EagleEye front coil for accurate pinpointing and small object detection.
- Easily switch from depth multiplier searching to pinpoint mode with the touch of a button.
- Eliminates the need to switch coils or have a second detector to zero in on a target.

GTI 2500 EagleEye Depth Multiplier Package

PN: 1120530

SAVE \$100

INCREASE YOUR DEPTH 2x-3x ON LARGE TARGETS

GTI 2500 EagleEye Multiplier Package includes the GTI 2500 Metal Detector with the 9.5" Imaging Searchcoil and TreasureHound EagleEye Searchcoil.

With Package
MSRP: \$1,299⁹⁰

TreasureHound EagleEye™
Searchcoil PN: 1611800
MSRP: \$299.95 (Searchcoil only)

For use only with the
Garrett GTI 2500 detector.

TOOLS & ACCESSORIES

You can prevent this!

Protect your investment with Garrett searchcoil covers.

SEARCHCOIL COVERS

 **10" x 14" Coil Cover**
PN: 1606400 \$19.95

 **9.5" Coil Cover**
PN: 1606500 \$9.95

 **9" x 12" Coil Cover**
PN: 1612600 \$14.95

 **8.5" Coil Cover**
PN: 1602200 \$6.95

 **6.5" X 9" Coil Cover**
PN: 1605700 \$14.95

 **5" x 10" Coil Cover**
PN: 1602500 \$14.95

 **3" x 7" Coil Cover**
PN: 1601400 \$10.95

 **4.5" Coil Cover**
PN: 1604200 \$4.95

 **8.5" x 11" DD Coil Cover**
PN: 1606600 \$14.95

 **5" x 8" DD Coil Cover**
PN: 1607400 \$12.95

HEADPHONES

Garrett Master Sound Headphones

- Dual volume controls for adjusting signal levels to suit individual hearing requirements and to enhance weak signals.
- Comfortable leather headband and ear cushions for maximum comfort.
- Reinforced 10-foot coiled cord with right angle.
- Speaker impedance: 8 ohms per channel. Mono/Stereo.
- Frequency response: 30-18,000 Hz.

PN: 1603000 \$29.95
with 1/4-inch stereo phone plug.

PN: 2202400 \$59.95
with water tight connector for use with *AT PRO*, *AT Gold*, *ATX*, *Infinium LS* or *Sea Hunter*.

Garrett ClearSound Easy Stow Headphones

- 41" (104.1 cm) coiled cord extends to 82" (208.3 cm)
 - Padded ear cups
 - In-Line volume control
 - Rotating ear pieces
- PN: 1612700 \$24.95

Submersible Headphones

- For use with Garrett *AT Pro*, *AT Gold*, *Infinium LS*, *ATX*, and *Sea Hunter Mark II* metal detectors.
 - Padded ear cups
- PN: 2202100 \$99.95

Garrett TreasureSound™ Headphones

Includes in-line volume control.
PN: 1612500 \$19.95

1/4" Headphone Adapter

- Allows land-use headphones with a 1/4" male jack to be used with the Garrett *AT Pro*, *AT Gold*, *ATX*, *Infinium LS* and *Sea Hunter* models. (Not intended for submerged use.)
- PN: 1626000 \$39.95

RECOVERY TOOLS

Camo Digger's Pouch

This 10" deep zippered bag secures with its own belt. Fits up to 48" waist.
PN: 1612900 \$11.95

Interior zippered treasure pocket to separate treasure from trash.

Exterior MOLLE-type webbing grid is ideal for attaching *PRO-Pointer*, cell phone, digging tools, etc.

Camo Pouch 18" Belt Extender

PN: 1613000 \$2.50

Treasure Pouch

Loop this 4.75" deep bag onto your belt. Contains 4 treasure pockets inside with a velcro fastener.

PN: 1608800 \$8.95

Garrett™ Edge Digger

(7.5" digging blade; 12" total length)

Strong carbon steel blade with cutting edge teeth. Non-slip blade guard with comfortable rubber handle. Includes Garrett carry sheath for belt mount use.

PN: 1626200 \$39.95

Treasure Probe

Locate your target with this 9" hunting instrument.

PN: 1605800 \$8.95

Stainless Steel Treasure Trowel

This 10" trowel has a ribbed, no-slip handle. A gauge on the inside blade measures in inches and centimeters.

PN: 1606100 \$14.95

Treasure Digger

Avoid marring coins while digging with this tough polymer trowel, with marks to gauge depth of a hole.

PN: 1606000 \$6.95

Treasure Digger Kit

Includes Treasure Pouch, Treasure Probe and Treasure Digger.

PN: 1601070 \$21.95

Rare earth magnet collects ferrous objects.

Garrett Retriever II™ Pick

(19" steel with hand grip and reinforced head in silver vein powder coat finish)

Includes chiseled 3" digging blade and a narrow tip on the other end for picking through tight, rocky areas. Use the powerful rare earth magnet on top of the *Retriever II* to extract ferrous items from your target area. Ideal for prospecting and shallow water hunting in rocky areas. Weight: 2.8 lbs. (Holster not included.)

PN: 1626700 \$64.95

RECOVERY TOOLS

SAND SCOOPS

Rugged Plastic Sand Scoop

PN: 1600971 \$19.95

Metal Sand Scoop

Made of anodized steel

PN: 1600970 \$39.95

Stainless Steel Sand Scoop

PN: 1600900 \$59.95

GARRETT GEAR

Visit garrett.com for T-shirts, other gear

Includes bungee cord to attach to a metal detector (attaches to D-ring on either left or right side of the daypack).

Garrett All-Purpose Backpack
Approximately 21" interior height x 13" width. Will hold a disassembled Garrett metal detector. Includes: adjustable straps; zippered front accessory pocket; interior searchcoil pouch; pair of side pouches to hold drinks.
PN: 1651700 \$14.95

Garrett Detecting Daypack
Approximately 19" interior height x 13.5" width. Adjustable straps; padded for comfort in the field.

- Two zippered compartments to store spare coils, accessories, snacks, etc. for field use.
 - Three interior pockets (two zippered), plus internal hook for attaching car key ring.
 - Sternum strap with quick release buckle.
 - Waist strap with utility pouch (to hold smart phone, treasure finds, sunglasses, etc.).
 - Two mesh exterior pockets for drinks, etc.
 - Exterior MOLLE-type webbing grid for attaching accessories.
 - Exterior straps to secure jacket, extra clothing.
- PN: 1626800 \$59.95

CAPS

One size fits most

Garrett Metal Detectors
Metallic logo with textured gold color
PN: 1663300 \$9.95

Garrett "AT GOLD"
Camo Cap
PN: 1664100 \$9.95

Garrett
Black Cap
PN: 1663100 \$9.95

Garrett "AT PRO"
Camo Cap
PN: 1633400 \$9.95

Garrett 50 Years
Limited Edition 50-Year Anniversary Cap
PN: 1621100 \$9.95

Garrett "ATX"
Camo Cap
PN: 1664200 \$9.95

BAGS

Stow and go—Holds any current Garrett detector without removing the searchcoil!

Digital Camouflage Soft Case, Universal Detector
Padded travel/storage bag, 50" length with full zipper opening, carrying handle and backpack straps.
PN: 1616901 \$84.95

Reinforced handle

Five velcro pouches to hold spare searchcoils, recovery tools, a *PRO-Pointer*, manual, gloves, etc.

All-Purpose Carry Bag
Reinforced polyester, 50" length with two zipper pockets. Includes convenient shoulder strap and carrying handles with padded handpad. Sized to hold any current Garrett detector without removing searchcoil.
PN: 1608700 \$29.95

Since 1974

KEY FEATURES AND TECHNOLOGY DEFINITIONS

ADJUSTABLE THRESHOLD

Allows the user to manually adjust the audio threshold (the constant background sound or "hum") to better hear targets.

ALL METAL (TRUE)

Detects all types of metal and provides the greatest possible detection depth and sensitivity.

ALL METAL IRON AUDIO™

Garrett exclusive feature that audibly identifies discriminated iron while operating in a True All Metal Mode.

ALL TERRAIN

Designed for use in wet, humid and dusty environments. Weatherproof housing can be submerged to 10 feet.

DIGITAL TARGET ID

Numerical scale from 0 to 99; indicates a target metal's conductivity for increased ability to distinguish targets from each other.

ELECTRONIC PINPOINTING

This non-motion All-Metal Mode function is used to precisely locate a detected target's location in the ground.

ENHANCED IRON RESOLUTION™

Increased resolution (more pixels) allows more precise control of how much iron discrimination to apply. This feature is particularly useful in areas where desired treasure targets are being masked by iron trash.

FAST TRACK™ GROUND BALANCE

Automatic feature that allows user to quickly ground balance the detector in mineralized soil conditions.

GRAPHIC TARGET ANALYZING

Simultaneously shows a treasure target's conductivity and the detector's discrimination pattern.

GRAPHIC TARGET IMAGING™

This Garrett exclusive technology measures and displays a target's true size (five size options) and its depth.

GROUND BALANCE (MANUAL)

Allows the operator to manually adjust the detector's ground balance to reduce the detrimental effects of ground mineralization.

GROUND BALANCE WINDOW™

Garrett exclusive feature that allows the user to "spread" the ground balance setting to reduce the response to subtle ground variations.

GROUND TRACK (AUTOMATIC)

Detector engineered with technology to continuously measure ground mineralization and automatically adjust itself for optimum performance. (Four track speeds on ATX)

HIGH-RESOLUTION IRON DISCRIMINATION™

Provides fine resolution of iron discrimination for the most precise ability to separate a good target from iron trash.

IRON AUDIO™

Allows user to hear discriminated iron (normally silenced) in order to avoid digging tricky, undesired flat iron targets such as bottle caps or steel washers. See page 23 for details.

IRON CHECK (ATX ONLY)

Allows the operator to audibly identify iron targets when using a DD searchcoil.

MULTI-FREQUENCY (PULSE INDUCTION)

Detector that divides its power into multiple frequencies to overcome the effects of mineralized soil and saltwater content. Discrimination and Target ID capabilities are limited.

ONE-TOUCH TREASURE HUNTING

With the touch of a button, your detector is: powered on; automatically reset to factory (or your) settings; and ready to search!

PRO MODE AUDIO

Proportional audio response and Tone Roll Audio features provide more target information. See page 23 for details.

POWERMASTER™ DSP

Digital signal processor technology improves your ability to search; helps adapt to ground conditions and to your individual scanning style/speed.

SCANTRACK™ OPTIMIZATION

Garrett's circuitry automatically adjusts to produce maximum audio signals on every detected target regardless of whether the user's searchcoil swing speed is slower or faster than optimum.

WRECK DIVING (200 FT)

Detector's housing and connections are fully sealed for ability to submerge the unit to depths up to 200 feet.

VOLUME CONTROL

Allows adjustment of the maximum volume of sound produced by the detector when a target is encountered.

**MADE IN AMERICA,
SUCCESSFUL WORLDWIDE**

In 1964, Mrs. Garrett and I founded our company to build a better metal detector than what I was able to buy on the market. Fifty years later, my engineers and I are continually striving to make the sport of treasure hunting more productive and more enjoyable.

Eleanor and I are pleased to say that all of our top-performing metal detectors are still made in America under the strictest quality control processes. We deeply value the fact that the brand name Garrett is synonymous with quality.

We are both so proud that the metal detectors we continue to make right here in Texas are used the world over to find fabulous treasures.

FREE Metal Detectors!

Each month, Vaughan Garrett selects one U.S. and one International winner from all the Garrett customers who submit their testimonial photos and stories. "By about the tenth of each month, I will announce who I selected as my favorites from all the previous month's submissions," Vaughan explains.

Vaughan's Favorite Find winners in the past have received a free *Pro-Pointer* pinpointer or even a metal detector. Visit garrett.com to see what great gift item Vaughan is currently giving away!

FREE Garrett branded items for everyone who enters!

Vaughan Garrett's FAVORITE FIND OF THE MONTH

There are 3 ways to submit a story to Vaughan:

1. Email testimonials@garrett.com
2. Mail to: Garrett Metal Detectors
Attn: Marketing Depart.
1881 W. State Street
Garland, TX 75042
3. Submit your photo and story online
by using the "Submit a Story" form:
<http://www.garrett.com/story/>

*You could be Vaughan's
next winner!*
